FES Flourish Formulas™

The Flourish™ line of twelve formulas encompasses the most fundamental body-soul healing issues facing people of all ages and lifestyles, including foundational remedies for animal care.

While each formula has a specific keynote, the entire Flourish™ line encompasses a broad-based healing approach for those new to flower essence therapy, or for those who require basic catalysts to initiate a healing response.

Each Flourish™ formula is designed to address foundational body-soul healing issues. Their role is to clear and stabilize so that more individualized flower essences can be of greater impact.

Each formula represents years of research and careful consideration in order to develop efficacious, synergistic components that form a greater wholeness. Many factors are taken into consideration in the development of each formula, including botanical signature, color, form and environmental habitat of the flowers, as well as key healing themes and flower affinities demonstrated through years of clinical research.

Each Flourish™ formula is carefully calibrated and hand-potentized by FES with meditation, prayer and positive dedication. As each petal contributes to the whole flower, each component of the Flourish™ formulas is alchemically combined to form a greater whole that shines with radiance and clarity.

The FES Flourish Formulas™ are a fusion of flower essences and minute proportions of the purest food-grade essential oils. They are calibrated to address the entire body-soul matrix, working in multi-level ways to promote health and well-being. All ingredients are prepared according to the highest standards of integrity and purity, and are wild-crafted or certified organic and/or Biodynamic.

Directions for Use:

Formulated for Direct Use – The formulas are conveniently packaged with spray tops, ready for direct application. The standard oral dosage is one or two sprays in the mouth, four times daily in-between meals or before eating. For emergency or intense healing episodes, dose more frequently until the condition has stabilized.

When to Use – The two most important times for application are when the body-soul matrix is shifting between wake and sleep: upon awakening, and just before sleeping.

Topical Application for Subtle Body Healing – The spray tops allow topical applications to be effortless and sanitary. One of the most effective topical applications is on the pulse point inside the wrist. Spray and then lightly rub in the mixture; then apply gentle pressure for a minute or so while breathing deeply. Other receptor sites, meridians, or chakra points respond very well to flower essences, depending on the knowledge and skill of the practitioner and the particular symptoms being treated. For example, it is very efficacious to apply the Sacred Heart™ Flourish formula on points along the heart meridian, in tandem with oral doses.

Topical Application with Cream – Apply one or two sprays per ounce of cream or lotion and then stir clockwise and counterclockwise.

General Mistng – The Flourish™ formulas can be very effective when lightly misted around the whole body, the head and surrounding body space. Be sure to close eyes and remove glasses before doing so. This method is a special favorite for many children.

Herbal Supplement Status – FES Flourish Formulas™ are herbal supplements. The information provided is not intended to diagnose, treat, cure or prevent any disease. These products and the statements made on this website have not been evaluated by the U.S. Food and Drug Administration.
